Full Arch Restorations (All-On-4)

Lunch & Learn anyone?

We know your time is precious. We also know you're probably open to the idea of growing your practice and expanding your service offerings. Full Arch Restoration is proving to be both a fantastic functional option for patients and predictable revenue generator for the private practice.

Here are a few of the most common questions we hear from our referring offices:

Q: Does my patient need to be fully edentulous?

A: No. Generally patients who are good candidates for Full Arch Restorations still have many of their natural teeth. Good candidates are those suffering from failing dentition.

Q: Can patients receive financing?

A: Yes, we can work with patients to finance all or a portion of this service through Care Credit or Lending Club.

Q: Do Drs. Gramins and Lin have experience in this type of procedure?

A: Yes, our doctors were early adopters of this procedure and we have done many cases in both our La Jolla and Poway offices.

Q: Is there a way for our office to learn more about this procedure?

A: Yes! It is most effective to train all staff members in the benefits and basics of the procedure. You never know when you'll see a qualified candidate and it's ideal for everyone to be comfortable discussing the procedure and answer basic questions.
